

LABOUR'S GREEN NEW DEAL WILL TACKLE THE CLIMATE EMERGENCY

Vote  Labour Thursday 12 December

IT'S TIME FOR REAL CHANGE

YOU CAN'T TRUST BORIS JOHNSON'S TORIES TO TACKLE THE CLIMATE EMERGENCY.

Boris Johnson dismissed global warming as "a primitive fear" that is "without foundation". Only Labour can stop Boris Johnson's Tories and tackle the Climate Emergency

UNDER THE TORIES:

- ✗ Investment in clean energy slashed three years in a row
- ✗ Fracking has continued
- ✗ Carbon reduction targets missed

Labour will kickstart a Green Industrial Revolution. Labour's Green New Deal will have the most ambitious climate targets of any country in the world and invest in green infrastructure on a massive scale.

Labour will:

- ✓ Invest in green energy to create hundreds of thousands of jobs
- ✓ Ban fracking
- ✓ Work towards a socially just path to net zero emissions by 2030

This general election is our last chance to radically change course. Only Labour will take the right action to protect our planet and future generations.
